

Summary of Compliance

Illicit Discharge Detection and Elimination (IDDE) FY1718

The IDDE program aims to respond and to resolve all spills, illegal discharges within the MS4 as soon as possible upon discovery. The Cities of Reno and Sparks conduct an annual field screening to investigate dry weather flows to identify any illicit discharges and connections to the Truckee River (BMP ID# MS4-03). Citizen reports by phone, email, or community system such as Reno Direct are used to identify and respond to illicit discharges as well as track responses.

Dry weather monitoring is performed annually. Flowing outfalls are screened in the field, qualitatively and quantitatively. The goal of dry weather monitoring is to identify any cross connections between sewer and storm drain system that may exist, and make corrections.

Number of Incidents Reported

	FY15/16	FY16/17	FY17/18
City of Reno	73	94	105
City of Sparks	122	109	89

Number of Cross-Connections Identified:

	FY12-13	FY13-14	FY14-15
City of Reno	0	0	0
City of Sparks	0	0	0

Number of Flowing Outfalls:

	FY15/16	FY16/17	FY17/18
City of Reno	2	3	4
City of Sparks	0	0	0

Number of Violations issued for Illicit Discharge

	FY12-13	FY13-14	FY14-15
City of Reno	3	3	1
