

## Summary of Compliance

---

### Illicit Discharge Detection and Elimination (IDDE) FY2122

The IDDE program aims to respond and to resolve all spills and illegal discharges within the MS4 as soon as possible upon discovery (Permit Section(s) Addressed: IV.G, V.C.3.J). The Cities of Reno and Sparks conduct an annual field screening to investigate dry weather flows to identify any illicit discharges and connections to the Truckee River (BMP ID# MS4-03). Citizen reports by phone, email, or community system, such as Reno Direct, are used to identify and respond to illicit discharges as well as track responses.

The Cities of Reno and Sparks conduct IDDE investigations for Washoe County within the Truckee Meadows stormwater and sewersheds, through the ILA as interpreted by the interlocal agencies. Beginning in FY2021, both the Cities of Reno and Sparks provide data counting the inspections occurring in unincorporated Washoe County, outside of their respective city limits. Both the City of Reno and City of Sparks provides this in the following IDDE Summary documents.

Dry weather monitoring is performed annually. Flowing outfalls are screened in the field, qualitatively and quantitatively. The goal of dry weather monitoring is to identify illicit discharges and any cross connections between sewer and storm drain system that may exist, and make corrections. Public Service Announcements continue to be run on local media outlets.

**Number of Incidents Reported:**

	<b>FY1920</b>	<b>FY2021</b>	<b>FY2122</b>
City of Reno	159	149	114
City of Sparks	85	50	83
WC (by CoR/CoS)	n/a	0	1

**Number of Cross-Connections Identified:**

	<b>FY1920</b>	<b>FY2021</b>	
City of Reno	0	0	0
City of Sparks	0	0	0
WC (by CoR/CoS)	n/a	0	0
